

Please do not do implement any proposal that will lessen Indiana's Telephone Privacy Law protections. Prior to the implementation of of Indiana's law, we were getting telemarketing calls almost everyday and at all times of the day and night. We even had them calling on Sunday at 10pm. It was difficult to set down with the family to eat a meal without getting at least one of the unwanted calls. Now we can set in the privacy of our own home, doing the things we enjoy without being constantly interrupted by these unsolicited calls. I would recommend that you pattern your proposal after Indiana's law. In any case though, do not preempt the tougher state privacy laws. Thank you.
